CRUISING ALTITUDES

LIGHT ACTIVATION CODES

All public airports listed below have at least one runway lighted at some intensity (original condition) during the hours of darkness. If lights are off during daylight hours, the radio control procedures listed below will activate lighting systems except as follows: if an airport is attended, a verbal radio request to the airport may be necessary to obtain lighting system activation.

The first step in the procedure listed for each airport (except Oshkosh) **MUST** be accomplished in order to activate the lighting system. After the first step is accomplished, the subsequent steps may be accomplished in any order desired. Return to the conditions of the first step may be attained at any time by accomplishing the first step.

All systems return to their original condition **15 minutes** after the last command.
